Managed Print Services

It's time to take control of your print environment

We can provide you with the technology needed to discover service and supply needs - before your printers go down. Let us maximize your uptime with preventative maintenance and proactive supplies fulfillment.

A simple software download gives us the ability to gather critical metrics from your imaging fleet. This information is the key to our ability to provide the ultimate solution for managing and maintaining your printing environment.

Managed Print Service is the Proactive Answer

Reactive service and supply of your imaging fleet is frustrating and disruptive to your business. There is a better process: we bring you the technology required to proactively manage your printing assets.

With a simple secure download, it is possible to view the current status of your printers and historical printing trends from an easy to use web interface.

This intelligent technology gives us the ability to proactively maintain your printing assets so you can maximize uptime and minimize costs. Let us manage your print environment remotely, without interrupting your day-to-day business.

Imaging Information at a Glance

Managed Print Services collects critical information for all the networked printers, copiers, MFPs and fax machines in your environment, such as:

- ✓ Current status
- ✓ Supplies levels
- ✓ Page counts
- ✓ Model descriptions
- ✓ Serial and asset numbers
- ✓ Printer locations
- ✓ Utilization
- ✓ Cost-per-Page tracking
- ✓ Automated service alerts
- ✓ Historical trending reports

**We don't just provide hardware—
We provide Solutions!**

The solution to help you take control of printing

Intelligent Technology

The Managed Print Services Data Collection Agent is installed on a single workstation at your location.

This software application runs in the background, collecting and transmitting critical imaging metrics to the Managed Print Services secure web server.

From then on, your printer information will be available 24 hours a day, 7 days a week via the secure website.

No personal or user data is collected with the software; only the core metrics needed to maintain and manage your printing assets are gathered.

System/Network Requirements

- Hardware: Desktop computer or server
- Operation system: Windows 2000/XP/Server 2003
- Network card: 100MB
- RAM: 256MB
- Internet connected browser installed
- Must be powered on all the time
- Does not have to be a dedicated system
- TCP/IP configured
- One of these ports must be open for automatic transmission of data: 443 (HTTPS - recommended), 80 (HTTP), or 20/21 (FTP)

What are you waiting for?

Put the power of Managed Print Services to work for you. Let us worry about managing your printing assets, you can take care of business.

Call today to arrange your Managed Print Services assessment.

Assessment options available: identification of all networked or local print devices, print device volumes, cost to operate print devices, print activity by user, activity by each print device, timelines/trends of activity of print devices and users. **All will conclude with recommendations for reducing costs & improving efficiencies**
